github.com/boanergejoe

## PROFESSIONAL PROFILE

Product-minded software engineer and design leader with 10+ years of experience delivering accessible, high-performance digital products for global enterprises and startups. Combines deep full-stack expertise in React, Node.js and cloud-native systems with UI/UX leadership across the complete product lifecycle, from discovery and design systems to global deployment.

## CORE COMPETENCIES

Full-Stack Development · UI/UX Architecture · Performance Optimization · Systems Architecture · Design Systems · Product Leadership

## PROFESSIONAL EXPERIENCE

**Director of Product Engineering** — TechNova Global Solutions — 2024 – Present

- Lead a 200+ engineering organization across 5 continents, owning delivery from ideation to global deployment.
- Introduced AI-driven development pipelines, reducing time-to-market by 38%.
- Established enterprise-wide accessibility and sustainability design standards.

**Senior Principal Engineer & Design Strategist** — Innova Digital Labs — 2020 – 2024

- Architected scalable microservices for financial and healthcare products serving 20M+ active users.
- Directed adoption of a unified design system across 12 product lines, increasing brand consistency and delivery speed by 50%.
- Mentored 40+ senior engineers into leadership positions.

**Lead Full-Stack Developer** — Skyline Interactive — 2016 – 2020

- Spearheaded immersive web applications with React, GraphQL and Node.js for high-profile clients.
- Reduced application load times by 70% through advanced performance optimization.
- Introduced component-driven workflows that became the company's standard practice.

**Senior UI/UX Designer** — PixelForge Studios — 2012 – 2016

- Designed award-winning digital experiences for global brands, earning multiple Awwwards and Webby Awards.
- Championed user-centered design by integrating continuous feedback loops into every sprint.
- Unified visual and interaction design across cross-functional product teams.

**Frontend Developer & Interaction Designer** — CreativeSpark Agency — 2008 – 2012

- Built responsive, interactive marketing websites during the rise of mobile-first design.
- Created high-conversion landing pages for major e-commerce campaigns.
- Developed custom animations that improved user engagement by over 45%.

## SELECTED PROJECTS

### AI-Powered Design Platform

Generative asset creation and automated scaling for e-commerce platforms, combining AI workflows with a responsive design system.

### Global E-Learning Platform

Scalable learning experience serving 1.2M+ active students worldwide, with accessible content delivery and analytics.

### Modular ERP System

Enterprise logistics and supply-chain manufacturing engine built as independently deployable modules.

### Fintech Predictive Dashboard

Real-time analytics, algorithmic trading signals and risk modeling for financial decision-makers.

## EDUCATION

### M.Sc. in Computer Science

2016 – 2018

Kigali Independent University **IEEE PUBLISHED AUTHOR**

- Specialized in software architecture, distributed systems and AI applications.
- Thesis on machine learning for predictive analytics and neural optimization.
- Published 2 peer-reviewed papers at IEEE international conferences.

### B.Sc. in Information Technology

2013 – 2016

Chinese University Juba, South Sudan **TOP 5% HONORS**

- Rigorous foundation in systems programming, networking and database management.
- Ranked in the top 5% across software engineering and algorithms coursework.
- Architected a campus-wide digital library management system.

## TECHNICAL SKILLS

**FRONTEND**

React · Next.js · TypeScript · JavaScript · Tailwind CSS · Framer Motion · Redux · Figma

**BACKEND & DATA**

Node.js · Express · GraphQL · MongoDB · PostgreSQL · Redis

**CLOUD & DEVOPS**

AWS · Azure · Docker · Kubernetes

## PROFESSIONAL STRENGTHS

Leadership · Problem Solving · Agile Methodologies · Mentorship · Strategic Thinking · Cross-Team Collaboration

## WHAT I DO

### Full-Stack Development

End-to-end web applications with modern frameworks and scalable backend architectures.

### UI/UX Architecture

Intuitive, accessible interfaces that prioritize user experience and conversion.

### Performance Optimization

Auditing and supercharging codebases for fast loads and seamless interactions.

### Systems Architecture

Microservices, API integrations and robust data models for enterprise needs.
